

Installing Microsoft Office on your home PC or Laptop

Students are now able to download the full version of Microsoft Office for PC or Mac free of charge with their C2k username for installation on personal and home computers. This is a straightforward process as per the steps below:

From the computer you wish to install Microsoft Office on, log in to MySchool

(www.c2kschools.net) and click the OneDrive icon:

This opens the Office 365 home page where the install link appears below the Office Online buttons. Click **Install** to start the process.

NB. At this stage a number of the Office Online items remain greyed out as this functionality has not yet been enabled.

From the Install page, the appropriate version of Office should be selected before clicking the **Install** button.

Outlook Calendar People OneDrive Tasks

Software

Office

Install the latest version of Office

This will install the following apps on your computer: Word, Excel, PowerPoint, OneNote, Access, Publisher, Outlook, Lync, InfoPath.

Word Excel PowerPoint OneNote Access Publisher Outlook Lync InfoPath

Language: English (United States) Version: 22-bit (Recommended) Advanced

Note: Installing additional languages on a computer that already has this version of Office doesn't count against your install limit (5).

Troubleshoot installation

Install

Not ready to install the latest version of Office?

If your computer doesn't meet the system requirements for the latest version of Office or your language isn't supported yet, you can install the previous version of Office.

Install Office Professional Plus 2010
Install Office Professional Plus 2010 language packs

This downloads a small installer file. Select **Run** to continue.

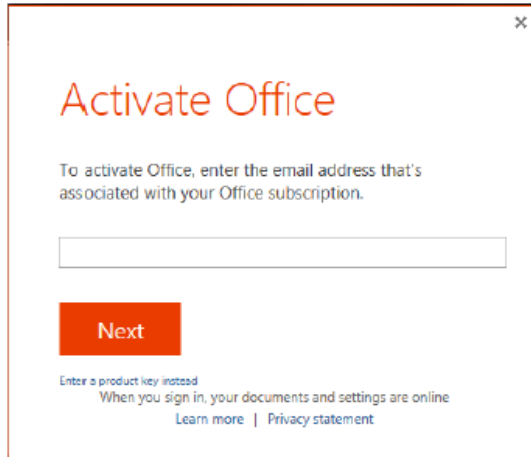

Once installed, the installation of the full Office suite will start. Please note, this is a large file (3Gb) and as such installation can take some time.

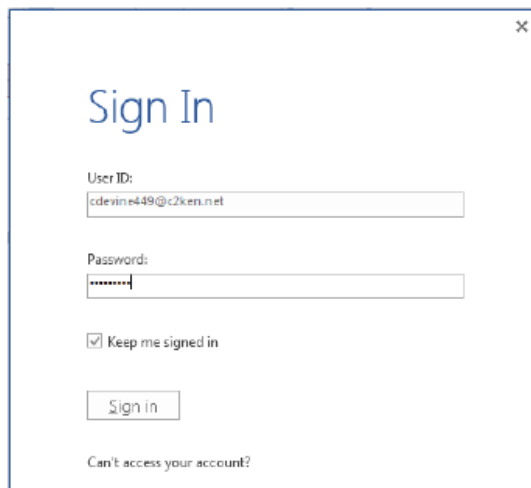

When prompted to activate the software, pupils should enter their username in the format:

<username>@c2ken.net

Please note this requires the domain @c2ken.net and NOT @c2kni.net.

To complete installation, a student will be asked to sign in. Again, the format is <username>@c2ken.net and the password is a student's normal C2k password.

Notes:

1. The installation of Office will remain available while a student's C2k username remains active. i.e. When a student leaves school, their C2k username will cease to be valid and the Office product will revert to a read-only version.
2. Each user can install Office on up to 5 devices. These can be a combination of PC and Mac.
3. If a user installs Office on a 6th device, the software will remain as read-only until one of the previous 5 installations is deactivated. To deactivate an installation, go to the Office 365 settings page and select **Software – Install and manage software** and then follow the instructions.
